

Dairy Questionnaire

1. Describe any processing of milk or any other by-product by the named insured, including what is being processed and how it is being processed.

2. What is the maximum amount of Hay that is stored in the barn(s). For the Hay that is stored in the open, what is the Clear Space between stacks and proximity to buildings?

3. What measures has the insured taken to prevent loss as a result of a power failure or electrical interruption?

4. Is there an experienced herdsman or supervisor on premises? Yes No If no, explain.

5. Describe the “Segregation Program” that the insured uses for animals that are on medication. This description should include, but not limited to, how the animal(s) are tagged or marked, how often they are tested, what is done with the milk of an animal on medication, where are the animals kept while on medication.

6. Describe the method that the insured uses to dispose of animal waste.

7. Who performs the majority of the medical treatment for the animals, a Veterinarian or the Insured? Explain

8. Indicate the creamery or co-op that has the contract for the insured’s milk, and advise if this company does a “charm test” before the milk is added to the tanker. Does the insured also test the milk?

9. Who is responsible for hauling the milk to the processing plant? _____

10. Describe any milk contamination losses that the insured has been responsible for in the past three years. Provide the year, amount paid, and what steps were taken to correct the error.
